ANOLYTE NON TOXIC DISINFECTANT

Anolyte is a Hypochlorous acid disinfection liquid, used at 500ppm strength the solution kills the viruses in under 15 seconds. At 500ppm, it can be safely used on your hands or any surfaces and is non-toxic to people meaning it can be fogged while people are present within a room or a closed environment.

It is 80 to 120 times more effective than Sodium Hypochlorite (bleach), so it kills viruses and bacteria quicker using less product at a low strength.

All humans can produce Hypochlorous acid within their own body, it is used to destroy invading & harmful bacteria, Much like the human body immune system, Anolyte ANK is an antimicrobial solution formed from naturally occurring elements, it attacks an array of microbial organisms. This process is chemically selective with no toxic or mutagenic side effects for higher forms of life.

ADDITIONAL INFORMATION

AVAILABLE CONTAINERS:	1000L IBC, 100L, 25L, 20L, 5L
EFFECTIVENESS:	Kills 99.999% of Germs
VIRUS CONTACT KILL TIME:	15 Seconds
MAIN INGREDIENTS:	Sodium Chloride, Hypochlorous Acid, Water
APPLICATION:	Fogging or Surface Decontamination
STRENGTH:	500ppm

Certified Under Biocidal Products Regulation (528/2012) Article 95
