Panorama EMU

Panorama Energy Monitoring Unit

Panorama Energy Monitoring Unit is a drop in solution to monitor any electrical load, with a setup time of less than 1 minute it can quickly be added to any electrical system to fully understand the loads being consumed.

With a new retractable trolley handle and rugged polyurethane wheels with stainless steel bearings, it offers smooth and durable transport. Peli's patented O-ring seal and automatic pressure relief valve keep contents dry and protected, even at high altitudes.

The data is automatically logged to our Think Energy Panorama system where fully customisable reports and dashboards can be generated based on the information you wish to track.

Features & Benefits

- Plug & Play
- 1 minute connection time
- Compact for easy transportation.
- App & desktop monitoring
- Rated to 125A 1PH & 3PH
- GPS tracked
- Geofence
- Rubber over-moulded handles
- 12-hour backup battery in the event of power loss
- Easy transportation
- Peli patented O-ring sealing system
- Automatic pressure relief
- IP67 Rated

Reduced
CO2 Emissions

Reduced
Fuel Costs

Specifications

DIMENSIONS & WEIGHT

LENGTH:	559 mm
WIDTH:	351 mm
DEPTH:	314 mm
WEIGHT:	10 kg

PARAMETERS LOGGED

• PEAK POWER	kW
• AVERAGE POWER	kW
• ENERGY CONSUMPTION	kWh
• VOLTAGE	V
• POWER FACTOR	PH
• CURRENT	I
• FREQUENCY	Hz

CONNECTION TYPE

125A 5 PIN IP67 COMMANDO PLUG/ SOCKET

ADAPTER SET AVAILABLE FOR 32A & 63A CONNECTIONS

HARDWIRED VERSION AVAILABLE FOR PURCHASE
